

# CASE STUDY

## Client

**Name:** Diamond Conway  
**Project:** Web Development  
**Date:** Ongoing Since 2016  
**Site:** [diamondconway.com.au](http://diamondconway.com.au)  
[estates.diamondconway.com.au](http://estates.diamondconway.com.au)  
[family.diamondconway.com.au](http://family.diamondconway.com.au)

## Brief/Objective

Nationally acclaimed Law Firm Diamond Conway approached FAQ to help create a WordPress based website to present themselves in an improved light as their previous online attempt was very outdated and not performing as a website should.

After some personal and detailed consultation the team at FAQ proposed what you see today a professional clean and reputable looking website that can handle all the varied and sort after information that law brings.

## Development

This site as mentioned was developed using WordPress. This allowed for a relatively painless build and gave the customer plenty of options to bolt on specific requirements to suit their needs. The website was very much off the shelf to start with FAQ still had to further develop several templates to suit Diamond Conway's requirements using PHP programming language to customise pages with.

## Result/Outcome

FAQ was able to deliver a cost effective responsive website, it has led to also bringing their other legal sites, Family law and Wills & Estates to the fore.

FAQ continue to support and maintain Diamond Conway Lawyers.
